POLK AUDIO SDA-CRS COMPACT REFERENCE SYSTEM

Circa 1980 - Classic Speakers

Here you go, I am still clearing out my basement of tube and electronics stuff. I have two pair of awesome POLK AUDIO SDA-CRS BOOKSHELF SPEAKERS, and will be selling the best (1) pair of them in this auction. Equally rare is the fact that I have the ORIGINAL POLK AUDIO BOXES and packaging as well as the Inter -Connecting CABLE all included in this auction.

These are truly awesome speakers. Please do not take my word for it. Try dumping "Polk Audio SDA-CRS" in to a search engine and read the comments other owners have written in some of the on-line reviews. These are some of the highest rated compact bookshelf speakers of all time. These SRS's are relatively tough to find in this shape and sought after by those that have heard them once. These speakers are nearly perfect in condition (see my feedback). The cabinets were the

POLK Walnut (Vinyl) and look much better than the black. They have a two 6.5" woofers, two silver dome coil tweeters and a large passive radiator in the rear. You gotta hear them.

Sadly, Polk has moved on to more modern stuff and just quit making these speakers. Polk Audio still has demand for parts for these babies. You can join Club Polk Audio on their web site (at no cost) and receive a nice discount on parts in the unlikely event you do burn out something. After 20 years I only replaced one woofer in all four speakers.

Ok PLEASE read the disclaimer below:

Disclaimer

The following is a big disclaimer that is brought to you by those people who are unwilling to learn, or unable to understand how EBAY works. We appreciate the majority of you who are bidders who actually follow through with their bids (THANK YOU!!!).

- Please ask all questions now, not after the bidding is over. We do not take responsibility for anything we did not mention due to our lack of knowledge about the specific item.
- We guarantee everything to be as we say it is, because we still have not mastered the art of mentioning things that are not known by us. If you are the expert, we defer to you to figure out everything prior to bidding!!
- When sending payment please specify which item it is for I have multiple auctions going at the same time.
- It costs the seller money when you back out of an auction, so please do not bid if you do not plan to honor your bid, period. Negative or non existent feedback will cause me to ignore your bid, unless you email me with your intentions to pay prior to bidding.
- I reserve the right to cancel bids if the above is not followed

Now back to the speakers.....

I was driving these with an high powered ROTEL amp/preamp set-up and was truly impressed with the tight accuracy in the bass response, the crystal clear high end and mid range voice that shames today's modern systems. The overall sound performance is achieved without distortion at any level with a good clean amp/preamp set-up. This small compact system will blow your mind.

Ok a word of caution!!! You should use a thick cable to connect the speakers to the amp. In addition the speakers also have a thick phase protected interconnecting cable between them. The "SDA Interconnect Technology" is unique to Polk's high end (SDA...."Stereo Dimensional Array") reference speakers (read more about it at Polk's web site or Audioreview.com). Professor Polk believed that stereo home speakers should perform like high end headphones.....i.e., TRUE and easily discernible stereo separation.....thus, "SDA Technology" was born.

But I am getting to old to have all this stuff, so I must part with some of it and am clearing most of it out on EBAY. These will be packed very carefully (insurance is required) and I accept PayPal. Please don't bid unless you're serious. They are really heavy I would guess 22 pounds per speaker box or more. Also, I'd suggest using the "Buy It Now" option because they can be bid beyond that relatively quickly.
