Here is another opportunity to own a pair of the Finest Home Speakers ever designed. This pair was purchased by me and have been used infrequently since new. They are in virtually new condition. Their performance is Superb. Interconnect

Cable for correct phase imaging is included.

Description from the Polk Audio website:

Matthew Polk's extraordinary new SDA Signature Reference System combines, for the first time, Polk's patented SDA TRUE STEREO technology with phase-coherent vertical line-source multiple driver topology to achieve new levels of state-of-the-art imaging, detail, coherence, dynamic range and bass reproduction.

Polk Audio is pleased to announce the introduction of an extraordinary new loudspeaker, the SDA Signature Reference System. The SDA-SRS will be the flagship model of Polk's highly successful SDA Series which will now be comprised of the SDA-1, SDA-2, SDA-CRS and the new SDA-SRS. This remarkable sounding, 3rd generation SDA speaker combines, for the first time, the latest refinements in Polk's exclusive and patented TRUE STEREO technology with time-compensated, phase coherent multiple driver vertical line-source topology. The result is a high efficiency system of awesome and seemingly limitless dynamic range and bass capability which reproduces music with a precise, lifelike, three dimensional soundstage which is unequalled.

Each 63.75" x 21 x 13 cabinet contains 8 Polk 6.5" trilaminate-polymer drivers, a planar 15" sub-bass radiator, 4 Polk 1" Silver Coil polyamide dome tweeters and an incredibly complex and sophisticated Isophase crossover system. One of the unique features of the crossover is the progressive variation of the high frequency high-pass circuitry which maintains virtual point source operation resulting in wide horizontal and vertical dispersion. Power handling is nominally rated at 1000 watts per channel, although the high efficiency of the system allows superb performance to be realized with even the most moderately powered receiver. Bass performance is, in a word, breathtaking. The use of 8 small active drivers coupled to the large 15" sub-bass radiator results in extraordinarily tight, quick and three dimensional mid and upper bass combined with low and sub-bass capabilities which are staggering (clean output at 25 Hz exceeds 100db!) An elaborate bracing system is employed resulting in a remarkably rigid cabinet which virtually eliminates colorations due to panel resonances. Separate inputs for high and low frequency sections of the system allows bi-wire or bi-amp operation without the need for a separate electronic crossover. The speakers are beautifully finished in oiled pecan.

Excerpt from 1985 Polk Audio promotional information

- Driver Complement
- Subwoofer 1 - 15" Diameter (38.10cm) Sub-bass radiator
- Midrange 8 - 6-1/2" Diameter (16.51cm) Trilaminate-polymer drivers
- Tweeter 4 - 1" Diameter (2.54cm) Silver Coil polyamide dome tweeters
- Electrical
- Recommended Amplifier Power 1000 w/channel
- Crossover Isophase
- Dimensions
- Cabinet Size 63-3/4" H x 21" W x 13" D
- (161.93cm H x 53.34cm W x 33.02cm D)

These Speakers are very heavy. It would be best if you picked them up, tho I could deliver them in local Minneapolis area, for \$50.00. If you really want them shipped, will attempt to do so but it would have to be on a cost basis only.

I accept PayPal, or money order, and a personal check which will be held till cleared.

Can take more photo's or answer questions, please e-mail if needed.

Good Luck bidding. These Speakers are UNMATCHED for sound and spaciousness. You will not be disappointed.
