Brand: **Polk**  
Cabinet Color: **Wood - Dark**

Wireless: --

Offered are a pair of very hard to find, no longer in production POLK Audio Stereo/Dimensional Array Signature Reference System speakers. If you are an audiophile, you will already know of these legendary speakers. These are huge speakers. 5'6" tall, 21" wide, 13" deep. Very heavy, 185 lbs each. These were over \$2,500 new, and as stated earlier, the only disadvantage is they have not been made since the early late 1980's. Original receipt, manual, and some article reviews. These are from my father's estate, someone who always had 'the very best' in audio and video equipment. Sadly, they simply are too big for my home now. Excellent condition, with the exception of the cables, there are some broken

places in the rubber insulation. Possibly just need some electrical tape.

PLEASE READ - PLEASE READ!! I have had many questions and kind replies regarding shipping. These are simply too heavy and large for shipping. Oversize for UPS, and Freight would be over \$600 to some sample domestic areas, and UNAVAILABLE to most areas. SO, LOCAL PICKUP OR DELIVERY ONLY PLEASE. I hope you understand. FREE DELIVERY within 100 miles, or 2 hours of South Jacksonville! Unloading help at destination would be needed! Will use hubbys covered dualie, and muscle here. : )

On Nov-29-04 at 14:43:53 PST, seller added the following information:

I have had a few inquiries regarding what appeared to be 'dents' in the dust covers of some of the midrange speaker. Although I have been assured this was only 'cosmetic' and did not affect the sound or overall quality, it bothered me. After much stressing and thinking about it, I used a VERY GENTLE suction on them. Success! Very easily puffed them right back as they should be. Although only a cosmetic thing, I did not want to have these appear to be 'defective' in any way. I can't seem to be able to post more pictures, but please e-mail for close up photos if desired. Thanks for your interest - Lauren
