Polk Monitor 5A Speaker System (1 Pair)

Here is a speaker system that helped develop Polk's reputation for fine speakers - the Monitor Series. The Monitor 5A is made up of a 6.5" woofer/mid driver, 8" passive low frequency radiator and dome tweeter that is only seen in Polk's high end speakers. The woofer uses a butyl rubber surround. This series of Polk's were one of their most successful ever. They helped give Polk the fine reputation they enjoy to this day. When you hear them you will know why - surprisingly low

bass, clear mid-range and a silky high end. This is one of my favorites in the Monitor line, ample bass in a compact cabinet with that super airy Polk high-end from the dome tweeter. The cabinets measure 10 1/2"w x 21 1/2"h x 9"d. This pair has walnut vinyl cabinets with removable black grills. I would grade them 8 out of 10 on cosmetics, This pair is acoustically perfect with working drivers. Original drivers are all like new cosmetically and functionally. Polk logos are intact below each of the near perfect grills. These were well taken care of but do show some signs of wear (paint marks on the side of one cabinet and some small chips on a couple of corners. It would be hard to match this compact speakers sound quality, at this price, in a new speaker sold today.

Serial#: 131107, 131122

I have enjoyed using these one owner speakers for many years and am only selling them because I have recently purchased a pair of LSi15's which I hope I enjoy as much.

I do not have the original box but I will take these to the UPS store for professional packaging and shipment. Each speaker weighs approximately 25lbs a piece.

Speaker stands pictured in this auction are not included.
